HARRY FOSTER
WEB DEVELOPER

BIOGRAPHY

A developer specialising in front-end development with significant additional back-end experience on a range of different types of project.

Proven experience in working as part of a team to deliver well written, accessible and reusable code and deploy it effectively, in a range of different programming languages, frameworks and libraries. Able to adapt and excited to take on new challenges.

Taken on project lead roles and is able to continuously learn from those with more experience than myself and pass on knowledge to more junior members of the team.

EMPLOYMENT

November 2019 – Present
Charles Tyrwhitt
Web Developer
Working within the development team to maintain, improve and create new features and functionality for the Charles Tyrwhitt eCommerce website which is based on the Salesforce Commerce Cloud Platform.

Daily tasks would include managing my workload in Issue & Project Tracking Software and then working on HTML, ISML, CSS, JavaScript and jQuery to achieve this. Often involved in meetings/discussions to strategise and the best way to implement upcoming projects.

After starting as someone who had never worked the SFCC platform prior to this employment I have gone on to become very proficient and a key person that others come to for knowledge. Additional responsibilities include DevOps and Support.

August 2016 – October 2019
The New Black Coffee
Web Developer
Developed and launched a proprietary point of sale till system that runs on iOS and a mobile application for customers to order online and pay for iOS and Android, both based on Apache Cordova. Maintained and extended the existing PHP based website.

Further details of my work with employers are available upon request
